

# HELP!

THE MOUNT AGUNG VOLCANO EVACUEES

## WHAT WE MUST DO?

### 1 | Before the eruption of Mount Agung

---

Dont Panic, stay calm, and find accurate information (facebook: mount Agung Relief)

Plan and decide the route to assembly point during earthquake

Prepare N95 Masker for Family

Prepare the medicine at home

Always prepare your mobile phone credit as long as the Mount Agung eruption warning is still up.

Prepare clean water and enough food for your pet and livestock.

If you have a children, teach them about the emergency (disaster) plan at school.

Prepare indoor games and activities at home.

If volcano ash warning is announced earlier before it happened, please go home as soon as possible.

If volcano ash is falling and you are still outside (workplace or going out), please stay indoor until the volcano ash has settled.

Volcano eruption actually will be followed with massive earthquake because the shifting of the earth plate and vibration of the eruption.

THE MOUNT AGUNG VOLCANO EVACUEES

## 2 | After the Mount Agung Eruption.

---

Use masker, handkerchief or cloth to cover your mouth and respiration. If you don't have masker, use wet cloth or fabric to cover them.

Close the door and window. Put towel or wet fabric on your home ventilation

Protect the electronic devices; cover with plastic and don't open the cover until all rooms are cleaned.

Break the pipe and gutters to prevent clog, and let the water and ash fall down to the ground

Do not wear contact lenses as this will result in cornea abrasions.

If there is ash in your water, let it settle and then use the clear water. If there is a lot of ash in the water supply, do not use your dishwasher or washing machine. Water contaminated by ash will usually make drinking water unpalatable before it presents a health risk.

If you have respiratory concern or illness (bronchitis, asthma, and Upper respiratory tract infection), please stay in indoor to avoid the ashes.

Clean the roof from thick ashes

# HELPA!

## THE MOUNT AGUNG VOLCANO EVACUEES

Volcano ashes will become big trouble because it can enter entire house or office, including the electronic devices, such as: TV, computer, camera, and another devices, that can make damages. The volcano ashes are quite different with ordinary ashes. It has crystal shape structure, that possible to make scratches and peel the surface when we brush or swap clean the electronics.

### 3 | How to Clean Volcano Ashes

---

Use masker before clean the ashes

Splash the water to the ashes. This will make cleaning easier and prevent the wind to blow the ashes

Dispose the volcanic ashes in the strong plastic bag

Volcanic ashes is very slippery, please mind your step while you walk or climb to the roof.

The volcanic ashes will clog your gutter and pipe so easily, please clean up

Splash the water in yard and the street to reduce the ash suspension. Please do not splash the water too much.

Please lightly water down the ashes. The ashes will become solid when we use too much water so it will be harder to be cleaned. This solid ashes will give additional weight to the roof. The roof become heavy, and the roof will collapsed

Don't drain off the ashes in to the pipe, it will clog the pipe

Provide the good air flow ventilation by opening all doors and windows before you start cleaning.

Please use effective cleaning method such as to wash with water and detergent.

Very recommended to use damp cloth and vacuum cleaner to clean the ashes.

Use fabric or sponge that already mixed with water and detergent, do the gentle rub (do not press) to clean glass from the ashes

# HELP!

## THE MOUNT AGUNG VOLCANO EVACUEES

Letusan gunung api biasanya disertai dengan gempa bumi yang cukup besar akibat terjadinya pergerakan dari dalam bumi dan getaran dari letusan gunung api.

# 4 | What to do during Earthquake

---

Do not panic.

Take cover to sturdy furniture. (Under the sturdy table, crouch in corner of the room, etc) and cover your head and face.

Hold onto your cover

If possible to find a way out from the building, go to the safe open space (assembly point)

Turn off the stove, electricity, and gas  
Make sure you know the location and how to use fire extinguisher

Avoid area that made from glass, elevator, and stairs

If possible to leave the building, please go to assembly point

Avoid trees, power pole or shaking building

If you live near the beach, please go find open space that is far from the beachside.

If you are driving, please stop and go out from your vehicle right away. Don't cross the bridge, because it is possible collapsing.

Assist others after you are already calm and ready.
